EXPERIENCE

IT Support Manager, *EMC IT Solutions*

May 2025 - Present | New York, NY

- Lead and mentor a team of support technicians, overseeing daily operations to ensure high-quality service delivery and adherence to SLAs across a diverse client base.
- Oversee the planning and execution of network upgrades, server installations, and on-site infrastructure deployments, ensuring projects are completed on time and aligned with client requirements and industry standards.
- Monitor system performance and proactively address recurring issues by analyzing support trends, implementing preventative measures, and coordinating long-term solutions with technical staff.
- Maintain active involvement in day-to-day technical support, deployments, and system maintenance to stay connected with client needs and support team effectiveness.

IT Support Engineer, *EMC IT Solutions*

August 2024 – May 2025 | New York, NY

- Provide hardware and software technical support to over 50 clients and 2,000 users, either on-site or remotely.
- Assist with site deployments using Ubiquiti Networks hardware.
- Provision new PCs and laptops with remote desktop capabilities and endpoint protection from Broadcom.

IT Intern, *Lavner Education*

June 2023 – August 2023 | Garden City, NY

- Assist with the setup and maintenance of on-site computer hardware, software, and internet connectivity.
- Provide ongoing troubleshooting and technical support to staff and students.
- Communicate tech issues quickly and effectively to company headquarters and offer solutions.
- Deliver quality, educational instruction to students in a class and/or one-on-one environment.

EDUCATION

University of Connecticut, Storrs, CT

Bachelor of Science, Computer Science, May 2024

Concentration: Systems and Networks

Relevant Coursework: Software Engineering, Data Structures, Cybersecurity, Computer Networks, Cloud Computing

Clubs & Societies: Gaming Club (Rainbow Six Siege Division Head), Society of Hispanic Professional Engineers, Car Club

TECHNICAL SKILLS

Programming Languages: Python, HTML, CSS, JavaScript, TypeScript, C, C++, Swift, Java

Libraries & Frameworks: React, React Native, Expo, Next.js, Node.js, Express.js, Tailwind CSS, Framer Motion, Flask

Tools & Platforms: Git, GitHub, Docker, Vercel, WordPress, Linux, Windows, MacOS, Ubiquiti UniFi, VMware, Synology, Microsoft Office, AWS, Kubernetes, Splashtop, Microsoft 365 Admin, Intune, Entra, Proxmox

RELEVANT PROJECTS

Hubsky, *Personal Project*

October 2023 – Present | Storrs, CT

- Developed and launched a mobile app for UConn students, utilizing React Native, Tailwind CSS, and Expo.
- Implemented features allowing users to access dining hall menus, organize schedules, receive class reminders, and check service status.
- Achieved 10,000+ downloads on the Apple App Store, showcasing the app's popularity and positive user reception.

Home Lab, *Personal Project*

July 2018 – Present | Garden City, NY

- Established and maintained a home lab environment, leveraging Proxmox virtualization to deploy and manage several virtual machines designed to host a media streaming experience similar to Netflix, serving content to ~25 users
- Orchestrated Docker containerization for various services including media recording software, VPN server, DNS ad-blocking, hardware monitoring, backups and storage redundancy with a goal of enhancing efficiency and optimizing resources available.
- Engineered and managed a robust home network infrastructure with Ubiquiti UniFi products, encompassing gateways, switches, and access points for seamless connectivity and optimal performance
